## Caution

IMPORTANT SAFETY PRECAUTIONS:

(1) **LIVES MAY BE AT RISK!** Please be aware of the electrical wires around. Carefully read the section **"OUTDOOR INSTALLATION WARNING"** in the manual before installation.

(2) Users **MUST complete grounding wired** with the device; otherwise, a sudden lightning could cause fatal damage to the device. **EMD (Lightning) DAMAGE IS NOT COVERED UNDER WARRANTY**.

(3) Users **MUST power off the device** first before connecting the antenna to it; otherwise, damage might be caused to the device itself.

(4) The Antenna and Surge Arrestor are required for each antenna connector, and must be purchased separately.

Product Installation

1) Install the backplane to the back of the AP.
2) Attach the L-type bracket to the backplane and fasten it.
3) Place the AP to the pole Anderson fasten it with the U-bolt kit, the AP can be mounted in the pole with a diameter of up to 2.5".

4) Attach the surge arrestors to each antenna connector.
5) Attach the antenna equipped with N (M) connector to each surge arrestor. Otherwise, connect the antenna through the N (M-pin) to N (M-pin) cable.
6) Plug the RJ-45 Ethernet cable into the PoE port of the AP through the waterproof kit, and plug the other side of the RJ-45 cable into the PoE device to finish the installation. Please remember to finish grounding by consulting the local electrical experts.
